

Experiencing technology introductory workshop

Information for secondary schools

Car mechanic

Programme:

- + Introduction to the job of car mechanic.
- + Here we go: I dismantle an engine to turn a piston into a pot for all sorts of things.

Preparing for the event:

- Advertising campaign aimed at pupils at the neighbouring secondary school

Cost of materials approx.

- No cost, we'll be using car engines and tools already available at the vocational college.

+ Vocational guidance :

Tools required:

- Toolbox
- Various spanners for dismantling
- Brake cleaning sprays

Notes on the procedure to be followed :

- Put on work clothes
- Safety briefing
- Dismantle the engines
- Remove and clean pistons

Safety instructions :

- Work clothes (provided by vocational school)
- Safety shoes (provided by the vocational school)
- Hair tied back
- The students will be accompanied by the teachers of the training course and by some students who are following a training course in the field of mechanics.
