Are you interested in technology and want to work with modern machines? As a machining technician, you will process metals such as aluminium and copper and manufacture precision components for exciting industries. If you enjoy working with your hands and are interested in machines and technology, then you will find a wide range of opportunities in a future-proof technical environment. You will program and operate CNC machines, monitor the manufacturing process and ensure that everything runs smoothly.

Your job as a machining technician is important for the manufacture of gears, machines and many other components that keep our world running. And best of all, you will always be at the cutting edge of technology and constantly developing your skills. For example, you could go on to manage your own workshops or departments.
