I.

Informatic

Logistics, transport and procurement influence many aspects of our daily lives. Are you wondering why you should work in logistics? The first reason is obvious: without logistics, the world would come to a standstill.

M.

Mathematics

Not only can you deal with different types of goods flows and transport, but you also work with companies of all sizes. One day you might have to organise the transport of a huge machine part across the country, and the next you might be shipping first aid supplies after a natural disaster. Anyone working in the logistics and transport industry can be sure that no two days are the same!
